

Light Breeze – Rack Mount Power Distribution Unit (PDU)

Product Overview

Add a little bit of body textThe Light Breeze Rack Mount PDU is a durable and reliable power distribution solution designed for server racks, networking environments, offices, and industrial applications. Built with a strong aluminum body and high-quality copper internal contacts, this PDU ensures stable power delivery, enhanced safety, and long-lasting performance.

Key Features

- 13A 3-Pin Plug with Built-in Fuse-Provides overload protection for safer operation and equipment protection.
- 2.5 RM Heavy Duty Cable-Equipped with approximately 1.8 meter cable length for flexible installation.
- 30A Heavy Duty Power Switch-High-capacity switch designed for reliable power control and durability
- 6 Universal Output Ports-Supports multiple device connections simultaneously.
- Safety Shutter Protection-Each socket includes a safety shutter to reduce the risk of unexpected electrical accidents.
- Premium Aluminum Body-Strong, lightweight, heat-resistant, and corrosion-resistant construction
- 19-Inch Rack Mount Compatible-Easily mountable in standard server and network racks.
- 100% Copper Internal Contacts-Ensures efficient conductivity, reduced heat generation, and long service life.

Technical Specifications

Parameter	Specification
Product Type	Rack Mount PDU
Mounting Type	19-Inch Rack Mount
Number of Ports	6 Ports
Plug Type	13A 3-Pin Plug
Fuse Protection	Yes
Cable Type	2.5 RM Heavy Duty Cable
Cable Length	2 meter
Power Switch	30A Heavy Duty Switch
Socket Safety	Individual Safety Shutters
Body Material	Aluminum
Color	Black
Internal Contacts	Copper
Protection	Overload Protection

Applications

- Server Racks
- Data Centers
- Networking Equipment
- Office Power Distribution
- Industrial Equipment
- CCTV & Telecom Systems

Advantages

- Enhanced electrical safety
- Strong and durable construction
- Reliable heavy-duty performance
- Easy rack installation
- Long-lasting copper connectivity
