

Brand: Lightbreeze

Model: LB-13-H-D-14-B-U-F

Product Overview

The Light Breeze LB-13-H-D-14-B-U-F is a reliable and efficient Power Distribution Unit (PDU) designed for professional power management applications. Engineered with a double-section configuration and 14 universal output sockets, it provides convenient and organized power distribution for server racks, network cabinets, offices, workshops, and industrial environments. Equipped with fuse protection, a heavy-duty power switch, and a 2-meter extension cable, this PDU ensures safe, dependable, and flexible operation for multiple connected devices.

Key Features

- 14 universal output sockets for versatile device compatibility
- Horizontal mounting design for efficient space utilization
- Double-section construction for improved power distribution layout
- Built-in fuse protection for enhanced electrical safety
- 2.5 RM heavy-duty power switch for reliable operation
- 2-meter extension cable for flexible installation
- Suitable for commercial, industrial, networking, and IT applications

Technical Specification

Parameter	Details
Brand	Light Breeze
Model	LB-13-H-D-14-B-U-F
Rated Current (RC)	13 Amp
Mount Type	Horizontal
Feature Type	Basic
Output Capacity	14 Way
Section Type	Double Section
Socket Type	Universal
Protection Type	Fuse Protection
Power Switch	2.5 RM Heavy-Duty Power Switch
Cable Length	2 Meter Extension Cable
Body Material	Aluminium
Internal Conduction	Copper
Body Color	Black
Installation Type	Rack / Cabinet / Wall Mount

Safety & Protection

- Integrated fuse protection against overload conditions
- Reliable power distribution for connected equipment
- Durable construction designed for continuous operation
- Enhanced operational safety for professional environments

Applications

- Server Racks
- Network Cabinets
- Data Centers
- Office Workstations
- Industrial Control Systems
- Telecommunications Equipment
- Electrical Distribution Setups
