

**Brand: Light Breeze**  
**Model: LB-16-H-D-10-B-C1310**

### Product Overview

The Light Breeze LB-16-H-D-10-B-C1310 is a professional-grade Power Distribution Unit (PDU) engineered for reliable power distribution in server racks, network cabinets, data centers, and industrial environments. Designed with a double-section layout and IEC C13 outlets, this PDU provides efficient power management for IT and networking equipment. Its horizontal mounting design and IEC C14 input connection make it a practical and dependable solution for modern infrastructure applications.

### Key Features

- 16A rated power distribution capacity
- 10 IEC C13 output sockets
- Double-section design for organized cable management
- Horizontal mounting configuration
- IEC C14 input connection for easy integration
- Durable aluminium body construction
- High-conductivity copper internal contacts
- Suitable for continuous operation in professional environments

## Technical Specifications

Parameter	Details
Brand	Light Breeze
Model	LB-16-H-D-10-B-C1310
Rated Current (RC)	16 Amp
Mount Type	Horizontal
Feature Type	Basic
Output Capacity	10 Way
Section Type	Double Section
Socket Type	IEC C13
Input Connection	IEC C14 Socket
Body Material	Aluminium
Internal Conduction	Copper
Body Color	Black
Application	Power Distribution
Installation Type	Rack / Cabinet Mount

## Safety Features

- Designed for stable and reliable power distribution
- Robust aluminium enclosure for enhanced durability
- Copper internal conductors minimize power loss
- Suitable for networking, telecommunications, and IT equipment

## Applications

- Server Racks
- Data Centers
- Network Cabinets
- Telecommunications Equipment
- Industrial Control Systems
- IT Infrastructure Installations
